Quality

A history of accreditation. For more than 20 years, Inorganic Ventures has been accredited by A2LA to ISO 17034 (formerly ISO Guide 34) & ISO 17025. These are the core standards of the analytical testing community, and Inorganic Ventures continues to lead the way in compliance to these quality standards. This means CRMs that are engineered to be stable, compatible, SI traceable and manufactured and tested under ISO 17034 & ISO 17025 guidelines.

Customs

Custom standards are Inorganic Ventures' specialty. Our catalog reveals only a fraction of the inorganic reference materials we can prepare. More than two thirds of our business is devoted entirely to preparing custom standards. As the leading manufacturer of custom inorganic standards, we've produced tens of thousands of unique blends for laboratories worldwide. It's our area of expertise, and perhaps the most prominent way in which we refine your results and redefine your industry.

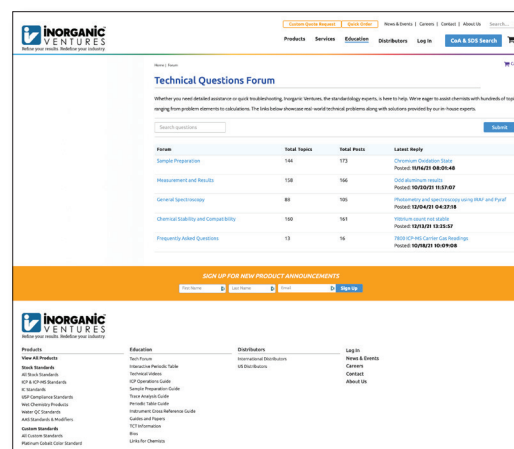

And More...

On the web. Our technical library has been expanding for over a decade. Topics include ICP operations, sample preparation, trace metals analysis and much more*. There you'll discover the best online tool for analytical chemists with our Interactive Periodic Table. It includes chemical compatibilities, preferred lines, major interferences and additional data for 70+ elements. inorganicventures.com/tech-center

Additionally, our stock SDSs and CoAs can be found on our website for current lots as well as many older ones.

1.0 ACCREDITATION / REGISTRATION

INORGANIC VENTURES is accredited to ISO Guide 34, "General Requirements for the Competence of Reference Material Producers" and ISO/IEC 17025, "General Requirements for the Competence of Testing and Calibration Laboratories". Inorganic Ventures is also an ISO 9001 registered manufacturer (SAM Global File Number 010190).

2.0 PRODUCT DESCRIPTION

Product Code: Single Analyte Custom Grade Solution
 Catalog Number: CGGD1
 Lot Number: J2-GD01080
 Metric: 7% (w/v) HNO₃
 Value / Analyte(s): 1.000 µg/mL, ex: Gd
 Starting Material: GdCl₃
 Starting Material Lot#: 1889
 Starting Material Purity: 99.824%

3.0 CERTIFIED VALUES AND UNCERTAINTIES

Certified Value: 999 ± 2 µg/mL
 Certified Density: 1.037 g/mL (measured at 20 ± 1 °C)

Assay Information:

Assay Method #1 999 ± 4 µg/mL
 ICP Assay NIST SRM 3115a Lot Number: 992004

Assay Method #2 999 ± 3 µg/mL
 EDTA NIST SRM 908 Lot Number: 508

- The Calculated Value is a value calculated from the weight of a starting material that has been certified directly vs. a National Institute of Standards and Technology (NIST) SRM. See Sec 4.2 for balance traceability.

The following options are used in the calculation of the certified value and the uncertainty. Resolved uncertainties represent expanded uncertainties expressed at approximately the 95% confidence level using a coverage factor of k = 2.

Certificate of Analysis (CoA)

Nearly every CRM we manufacture includes a highly detailed Certificate of Analysis. As an ISO 17034, A2LA accredited manufacturer, we provide certificates that include extensive data to meet the quality requirements of any laboratory:

- **Traceability** – to specific NIST SRMs and lots
- **Certified Values** – based on two independent methods
- **Trace Impurities** – listed with the actual values
- **Uncertainties** – detailed information reported

We're here to help. We don't just manufacture inorganic CRMs, we also provide technical support when it is needed so you can do your job. Because inorganic chemistry is all we do, Inorganic Ventures has a dedicated technical support team that can assist you with hundreds of topics: sample preparation, method development, ICP-OES and ICP-MS measurement issues and much more. You'll be amazed when you talk to a real person with a technical background ready to help you.

Our technical advisors are available to assist you Monday through Friday, 8:00 a.m. to 5:00 p.m. EST.

We can assist you with...

- Sample preparation
- Spectral interferences
- Chemical compatibilities
- Various ICP-OES & ICP-MS measurement issues

OUR GUARANTEE

Unquestionable integrity.

We believe in our products. And we value our customers. That is why every order leaving our facilities includes our "Declaration of Integrity." This document guarantees your satisfaction. Simply said, if you're dissatisfied with your order for any reason and we cannot work through the problem with you, a full refund will be issued, no questions asked.

INORGANIC VENTURES®

Declaration of Integrity

While our reputation is nearly perfect, we are not infallible. That is why every order we ship includes this document. Herein we state, in no uncertain terms, that we are 100% accountable for the quality of our standards and service.

Therefore, if you are dissatisfied with your order for any reason, tell us. We will resolve the situation in whatever way works best for you:

- A full refund
- Complimentary technical services
- A replacement item rushed to you at no cost

Our company was founded on integrity. If our standards are not measuring up to yours, we want to know.

Together, they explore the realm of ICP, sharing tips and tricks and diving deep into all things analytical chemistry.

TCT
Transpiration Control Technology

The cornerstone of the scientific community is accuracy. That's why Inorganic Ventures has always been committed to producing the industry's most exact Certified Reference Materials.

But our control...and the control of every standard manufacturer...ends shortly after a standard is calibrated and packaged. We are now changing the way we deliver our quality standards.

About TCT
Transpiration has been discussed in the scientific literature for years (e.g. Schimmler, 1958), and national metrological institutes such as NIST (National Institute of Standards and Technology) began discussing transpiration on certificates in the 1990s. Additionally, the packaging industry (among others) has published data regarding transpiration, though the effect is typically referred to as moisture vapor transmission rate (MVTR) or water vapor transmission rate (WVTR).

After 20 years of data gathering and careful research, we are proud to unveil Transpiration Control Technology (TCT), a new packaging system that drastically extends the shelf-life of our standard CRMs.

With TCT, concerns about shipping or storage conditions are eliminated, as transpiration is no longer an issue, which saves you money and simplifies research by removing the need to constantly inventory and retest CRMs.

What is Transpiration?
Transpiration refers to the passage of water vapor through the walls of a container and/or evaporation from the container opening. Transpiration results in an increase in the concentration of the CRM/MS.

What is the solution?
Transpiration Control Technology extends the shelf-life of the product. Inorganic Ventures uses a specially designed aluminumized bag that prevents an increase in concentration of the CRM/MS until the TCT bag is opened.

How it works.
The cornerstone of the scientific community is accuracy. That's why Inorganic Ventures has always been committed to producing the industry's most exact Certified Reference Materials.

But our control...and the control of every standard manufacturer...ends shortly after a standard is calibrated and packaged. We are improving the way we deliver our quality standards. The sealed TCT bag stops the loss of water vapor from the bottle when equilibrium is reached inside the bag.

Has the product changed?
The product has not changed. It is the same high-quality product you have come to depend on from Inorganic Ventures. It is the same but only better. TCT is an investment we are making to extend shelf-life and give you more control at no extra charge. Our products and unconditional guarantee remain the same.

What is transpiration?

Transpiration refers to the passage of water vapor through the walls of a container and/or evaporation from the container opening. Transpiration results in an increase in the concentration of the CRM/RM.

What is the solution?

Transpiration Control Technology extends the shelf-life of the product. Inorganic Ventures uses a specially designed aluminized bag that prevents an increase in concentration of the CRM/RM until the TCT bag is opened.

How it works.

The sealed TCT bag stops the loss of water vapor from the bottle when equilibrium is reached inside the bag.

What this means for you.

When you order standards from Inorganic Ventures, your product will be delivered in the TCT bag. This means you will be in control of the expiration date. Upon receiving the product, do not open the TCT bag until you are ready to use. To find out how long the product can be in the TCT bag before it expires, simply check the lot expiration found on the bottom left of the front label. Your product will expire on that date or one year after opening the sealed TCT bag, whichever comes first.

Custom Standards

- ✓ Made to your exact specifications
- ✓ Save time and money

- ✓ Produced under ISO 17034
- ✓ 5-year shelf life with TCT

MAGIC HAPPENS WITH A CUSTOM SOLUTION

Mixing individual, single element standards into a working solution requires time, resources and money.

It involves preparation costs like time intensive labor and equipment, administrative costs associated with stocking and measuring re-order points for each solution, and the responsibility of handling all supporting documentation.

Our expert chemists make magic happen in the lab so that you can put these burdens by the wayside!

Each custom blend is calculated, formulated, articulated and regulated.

All of our custom blends are certified, NIST-traceable and have been put through a rigorous stability and method validation process.

Each custom standard is produced under ISO 9001, ISO 17025 and ISO 17034.

Our custom solutions are manufactured according to your exact specifications and ready for use with no preparation required!

In addition, each custom is guaranteed a 5-year shelf, thanks to our Transpiration Control Technology (TCT) which puts you in control of the expiration date!

Our Custom Product Development Team is available to facilitate sample preparation and troubleshoot any problems that may arise during testing.

PRIMARY CERTIFIED REFERENCE MATERIALS

Primary Certified Reference Materials

Newly developed Os and Ir PCRM™s from Inorganic Ventures are a step above our normal Certified Reference Materials because they achieve the highest possible level of metrological traceability.

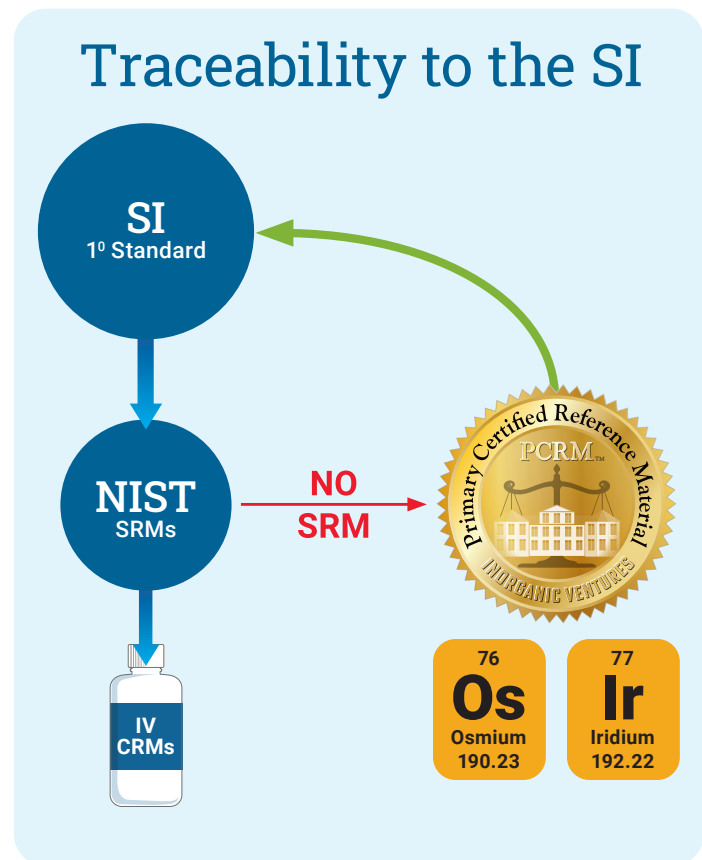

Osmium and Iridium PCRMs are the only rigorously developed solution standards traceable to the International System of Units (SI) for these elements. They can be used with the same degree of confidence as solution standards from National Metrology Institutes (NMIs).

PRIMARY CERTIFIED REFERENCE MATERIALS (PCRMs)

PCRM-IR-1000
1000 ug/g Ir solution standard in 10% v/v HCl 5x10ML Ampoules

How do I request a custom CRM?

Custom solutions can be requested through our convenient online quotation form. If you are unable to use our website, you may submit custom quotes through email, fax or by phone. All we need from you is a previously quoted IV part number, another manufacturer's part number, or for a brand new solution, the desired analytes, concentrations and matrix requirements.

www.inorganicventures.com/quote/instrumentsetup/index

email: quotes@inorganicventures.com

What happens after I submit my request?

Your custom quote is put together by our experienced chemists.

First, they go through our extensive library of more than 70,000 blends that have been developed over the last 38 years. If they don't find a match, they start formulating your exact custom standard. During this process, the blend is reviewed for stability and chemical compatibility. Your quote will be processed within two business days!*

I received the quote and I'm ready to order my custom!

If you like what you see, place your order via phone, fax or email. Your standard will be manufactured, packaged, and ready to ship within 10 business days. The custom standard is protected by our Transpiration Control Technology (TCT) and retains scientific integrity for five years from the date of manufacture.**

Effortless Savings. Efficient Ordering.

With Total Volume Pricing on Custom Standards

1. Consolidate into ready-made.

Consolidate your single element standards into one ready-made custom standard. Compatibility concerns? Our world-class chemists will use your specifications and do the work for you.

2. Plan ahead with extended shelf life.

Calculate your annual usage of a custom product before you submit your request. TCT guarantees product shelf life for five years.

3. Enjoy zero-risk savings.

The image illustrates three pricing scenarios. On the left, a single white plastic bottle is shown above a blue rounded rectangle containing the text 'Single bottle price \$\$\$/bottle'. In the center, four white pouches with blue accents and the TCT logo are shown above an orange rounded rectangle containing the text 'Total Volume Pricing \$/bottle'. On the right, a green piggy bank with a dollar bill sticking out of its top is shown above a green rounded rectangle containing the text 'Potential Savings \$\$/bottle'. Below these three options, a line of text reads: 'Order in volume to secure your savings and on-hand supply. We stand by our 100% guarantee and will work with you to make sure your order suits your exact testing needs.'

ICP-OES & ICP-MS

Whether you use ICP-OES or ICP-MS, we offer a wide selection of Certified Reference Materials. At your request, we've expanded our line with new instrument setup standards. And we'll continue to improve our selection based on your feedback.

SEPT. 17-19 » CHRISTIANSBURG, VA

Inorganic Ventures' Annual ICP Conference

Calling all ICP users – don't miss our annual ICP Conference held in the fall.

You will hear from Inorganic Ventures' experts on a wide range of topics, including Sample Preparation Basics for ICP, Sample and CRM Stability Considerations, Trace Metals Analysis and much more.

For more information, visit <https://web.inorganicventures.com/icp-training-2024>

Manufactured with high-purity starting materials and reagents. Products can be used for calibration of analytical instruments, validation of analytical methods, or for other applications deemed fit for purpose by the end-user. USP Method <232> – Elemental Impurities Compliance Standards

Manufactured with high-purity starting materials and reagents. Products can be used for calibration of analytical instruments, validation of analytical methods, or for other applications deemed fit for purpose by the end-user. Can be diluted with other multi-element standards to working concentrations. Certificate of Analysis includes lot specific trace metal impurity analysis.

For the pharmaceutical industry, Inorganic Ventures has developed CRMs to comply with the United States Pharmacopeia (USP) general chapters on elemental impurity USP <232> limits and USP <233> procedures.

These methods are for testing inorganic impurities in pharmaceutical products by ICP. The International Conference on Harmonization (ICH) Working Group on Elemental Impurities is in the process of developing a harmonized approach for controlling these impurities as well.

MULTI-ELEMENT STANDARDS

Heavy Metals – Single Element Standards

Bringing Confidence to the Cannabis Industry

In an industry where regulations and testing requirements vary by state, put your trust in Inorganic Ventures. We aim to squash inter-laboratory variations in the Cannabis industry and make it easier for your lab to get accurate results time and time again.

We offer single and multi-element standards to ensure your final product is free of dangerous heavy metals that may arise from soil contamination in agricultural production or manufacturing processes.

- Extensive documentation: Certificate of Analysis (CoA) and Safety Data Sheet (SDS)
- TCT packaging prevents transpiration, guarantees a 5-year shelf life, and allows for storage outside of normal lab conditions.
- 100% satisfaction guarantee

Does your state require testing for elements in addition to the Big 4? Request a custom quote! As the leading manufacturer of custom inorganic standards, we've produced tens of thousands of unique custom blends for laboratories worldwide.

MULTI-ELEMENT STANDARDS

Heavy Metals – Multi-Element Standards

While our USP <232>/ICH Q3D stock products were formulated for the pharmaceutical industry, these products can be used to test heavy metals in cannabis. The Big 4 (Arsenic, Mercury, Cadmium, and Lead) are common analytes for cannabis testing.

Ca	5,000	Na	5,000
Co	500	Ni	500
Cr	200	V	500
Cu	250	Zn	500

For use as ICP calibration standard in EPA Contract Laboratory Program (CLP) methods. Does not contain antimony (Sb). Please see CGSB1 or CLPP-SPK-2 for suitable Sb reference standard.

Calibration Standard			
CLPP-CAL-3		Matrix: HNO ₃ Dilution 1:100	
CLPP-CAL-3-125ML		Volume: 125 mL	
Analyte	µg/mL	Analyte	µg/mL
As	1,000	Se	1,000
Cd	500	Tl	1,000
Pb	1,000		

For use as ICP calibration standard in EPA Contract Laboratory Program (CLP) methods. Does not contain antimony (Sb). Please see CGSB1 or CLPP-SPK-2 for suitable Sb reference standard.

Calibration Standard	
CGSB1	Matrix: HNO ₃ /Tartaric Acid Dilution 1:100
CGSB1-125ML	Volume: 125 mL
Analyte	µg/mL

CICV Standards – Continuing and Initial Calibration Verification

CICV Standard†			
QCP-CICV-1		Matrix: HNO ₃ Dilution 1:100 or 1:500	
QCP-CICV-1-125ML		Volume: 125 mL	
Analyte	µg/mL	Analyte	µg/mL
Ag	125	Fe	500
Al	1,000	K	2,500
Ba	1,000	Mg	2,500
Be	25	Mn	250
Ca	2,500	Na	2,500
Co	250	Ni	250
Cr	100	V	250
Cu	125	Zn	250

For use as initial/continuing calibration verification standard in EPA Contract Laboratory Program (CLP) methods. Does not contain antimony (Sb). Please see CGSB1 or QCP-CICV-2 for suitable Sb reference standard.

CICV Standard†	
QCP-CICV-2	Matrix: HNO ₃ /Tartaric Acid Dilution 1:100 or 1:500
QCP-CICV-2-125ML	Volume: 125 mL
Analyte	µg/mL
Sb	500

For use as initial/continuing calibration verification standard in EPA Contract Laboratory Program (CLP) methods. For analyses requiring antimony (Sb). Designed to be diluted to working concentrations with QCP-CICV-1 and/or QCP-CICV-3.

CICV Standard†			
QCP-CICV-3		Matrix: HNO ₃ Dilution 1:100 or 1:500	
QCP-CICV-3-125ML		Volume: 125 mL	
Analyte	µg/mL	Analyte	µg/mL
As	500	Se	500
Cd	250	Tl	500
Pb	500		

For use as initial/continuing calibration verification standard in EPA Contract Laboratory Program (CLP) methods. Does not contain antimony (Sb). Please see CGSB1 or QCP-CICV-2 for suitable Sb reference standard.

†Manufactured from in-house Second Source concentrates, whenever possible.

6020TS-125ML		Volume: 125 mL	
Analyte	µg/mL	Analyte	µg/mL
Co	10	Li	10
In	10	Tl	10

For use as general tuning solution suitable for numerous ICP-MS designs and models. Covers mass range from Li to Tl. Certified reference material that may also be used for calibration.

Tuning Solution			
2008TS		Matrix: HNO ₃ Dilution 1:100 to 1:1,000

For use as ICP-MS tuning solution in EPA Method 200.8.

Blank & Rinse Solutions

Blank & Rinse solutions are prepared using double-distilled reagents and 18 megohm (MΩ) deionized water. They come packaged in ultra-clean LDPE bottles and are ready to use. Custom solutions are available upon request.

2% (v/v) Nitric Acid Rinse	
CLP-MS-RINSE	Matrix: HNO ₃
CLP-MS-RINSE-125ML	Volume: 125 mL
CLP-MS-RINSE-500ML	Volume: 500 mL

See pg. 108 for more Blank & Rinse Solution options.

For use as ultra-pure nitric acid ICP rinse or blank solution. Suitable for EPA Contract Laboratory Program (CLP) methods. Manufactured using ultra-high purity HNO₃, >18 MΩ deionized water, and packaged in specially cleaned LDPE bottles. Certificate includes trace metal impurity values representative of typical analyses.

200.7 Calibration

Standards for Method 200.7 are designed for use with ICP-OES. Custom EPA standards are available upon request. Standards are designed for Method 200.7, Method 3120, Method 6010A Rev. 1 and Method 200.7 CLP-M.

Now, YOU control the expiration date.

With TCT, concerns about shipping and storage conditions are eliminated, as transpiration is no longer an issue. This saves you money and simplifies research by removing the need to constantly inventory and restock CRMs.

Find out more at inorganicventures.com/tct.

If you've been searching for an atypical Ion Chromatography standard, look no further.

Over the years, we've developed the most complete line of IC standards on the market. Our technicians have stabilized more than a dozen rare anion and cation standards that you won't find anywhere else.

Our priority is your total satisfaction. Should you ever have a problem with any standard, Water QC or otherwise, let us know. We'll immediately investigate the problem by testing a retained sample of your solution. If the error is on our end, you'll be offered a full refund or a free replacement – your choice.

Each pH standard is compatible with your instrumentation and meets all requirements for calibration by a true Certified Reference Material. Each standard is traceable to a NIST SRM and is engineered for long-term stability. Manufactured under our ISO 17034 accreditation, each pH standard comes with a CoA and a temperature chart for your convenience. Each product is packaged in our TCT technology with a multi-year shelf life and a one-year* expiration date from opening. All product labels and SDS are GHS-compliant.

pH BUFFERS SPECIALLY FORMULATED FOR USP <791>

For analysts in the pharmaceutical industry tasked with maintaining proper pH meter calibration in accordance with USP <791>, Inorganic Ventures' CRMs deliver confidence, control, and support.

Our pH buffers are NIST-traceable and manufactured and tested under ISO 17034 and ISO 17025 guidelines. Each standard is accompanied by a detailed Certificate of Analysis (CoA), displaying certified values for multiple temperatures. In addition, these solutions are formulated to meet USP <791> specifications* and are ready to use right out of the bottle.

pH Buffer Features:

- **NIST-traceable standards, certified within 5% of the nominal values and associated uncertainties of no more than 0.05 pH units.**
- **Packaged in Transpiration Control Technology (TCT) which guarantees scientific integrity for 5-years from the date of manufacture.**
- **Ready to use with no preparation required.**

WE OFFER A COMPLETE LINE OF PH CALIBRATION STANDARDS, SUITABLE FOR CALIBRATION AS SPECIFIED IN USP <791>.

Dissolution Reagents & Stabilizers

Dissolution Reagents are designed for the preparation and measurement of samples containing silica mixed with fluoride insoluble elements, including zeolites, alumina and/or silica based catalysts, sand, limestone, coal fly ash and talc.

These products permit the simple dissolution of silicates without additional equipment, and are designed for ICP measurement of Si and other elements using traditional glass-based sample introduction systems.

The following products are intended to be used together; UA-1 for sample dissolution and UNS-1 for neutralization and stabilization. Please see the article titled Elemental Analysis of Zeolites on our website for more information. Custom dissolution reagents for specific applications are available upon request, and please contact us for more information.

Acid Dissolution Reagent	
UA-1-500ML*	Volume: 500 mL
Recommended for the dissolution of aluminosilicates, such as zeolites.	

Stabilizing Reagent	
UNS-1-500ML*	Volume: 500 mL
Designed for use with UA-1.	

*UA-1-500ML and UNS-1-500ML are custom solutions, made to order with 10-day turnaround time. Please request a custom quote.

Export Orders

We have representation in countries across the globe. Contact your distributor for regional pricing, orders and additional catalogs. Visit our website to find the distributor in your area.

Our Guarantee

As stated in our Declaration of Integrity (see pg. 7), if you're dissatisfied with your order for any reason, we'll resolve the situation in whatever way works best for you:

- A full refund;
- Complimentary technical services; or
- A replacement item rushed to you at no cost.*

Returns, Exchanges and Damaged Goods

Situations not covered under the terms of our guarantee (above) may require a return and/or exchange of the product. Refunds, replacements and exchanges are considered at management's discretion. Items will only be accepted for return with a valid return authorization number. Contact us to receive this number.

All transportation and packaging expenses on returned or exchanged items are assumed by the customer. Credit for returned items is subject to a modest 15% restocking charge. Credit will not be issued until it is determined by our inspection that returned items are unused and undamaged. All returned items must be received within 60 days of the original invoice date.

If carton is received in a conspicuously damaged condition, alert carrier and refuse acceptance.
